

Ensuring All Orange County Children Enter School Ready to Learn

2012 Legislative Priorities

SUPPORT EFFECTIVE STRATEGIES FOR PREPARING CHILDREN FOR SUCCESS BY RESTORING \$38 MILLION IN NON-REOCCURRING STIMULUS FUNDING THAT WAS SUBSTITUTED FOR RE-OCCURRING FUNDING FROM 2008-10 AND REQUIRE A STATEWIDE PRE/POST ASSESSMENT TO MEASURE DEVELOPMENTAL PROGRESS

Providing School Readiness Services (child care assistance) keeps Florida's families working and Florida's children learning!

- Children attending quality School Readiness Programs make developmental gains that support their success in school and productivity in life¹. **Yet Florida has not required a statewide assessment process to ensure such gains are demonstrated.**
- 50% of Florida's 1.34 million young children (under the age of 6) live under 200% of poverty and 24% live under 100% of poverty². In Orange County, the number of children under the age of five living in poverty is 26.2%.
- Only 236,147 children received child care subsidies in 2010-11 due to funding limitations (meeting child care needs of less than 30% of eligible children)³. **In Orange County, over 10,000 children languish on our waitlist.**
- Child care businesses in FL (primarily small business, representing over 2% of Florida's small businesses) make significant contributions to local economies: \$1.1 billion in wages and \$1.8 billion for industries that support child care^{4,5}. **In Orange County, over 637 small businesses work with the Coalition to prepare children for school.**

SUPPORT A HIGH QUALITY VOLUNTARY PREKINDERGARTEN PROGRAM AND KINDERGARTEN READINESS ASSESSMENT PROCESS

A high quality Voluntary Prekindergarten (VPK) ensures children enter school ready to learn and increases their potential for future productivity! High quality cannot be achieved if funding per child continues to be decreased!

- Florida meets only 3 of 10 national standards for prekindergarten programs⁷
- Florida does not meet teacher-to-child ratio, teacher education and in-service, child screening and assessment, and curriculum standards for high quality

A high quality Kindergarten Readiness Assessment process provides appropriate information on children's learning and development to inform VPK programming and kindergarten classroom practices!

- High quality readiness assessment includes child and program assessments rather than year-end Pre-K tests

SUPPORT THE EFFICIENT PUBLIC-PRIVATE PARTNERSHIPS AND LOCAL DECISION MAKING OF EARLY LEARNING FUNDING THROUGH EARLY LEARNING COALITIONS (ELCs)

Local decision-making allows local citizens to make the best decisions for the needs and priorities of local communities, and ELCs work efficiently!

- ELCs leverage over \$40 million in local contributions for early learning, with \$17 million used as state match to draw down federal dollars. **Annually, the Orange County Coalition raises over \$1.2 million in local funds.**
- ELCs share resources, best practices, and maximize revenues
- ELCs average 9.5% in administrative and program support (e.g., eligibility determination, provider payments, child care resource and referral) costs although the cap is 19%⁶. **The Orange County Coalition commits 10.5% for these services.**

***Florida's economic growth strategy starts at birth by investments in early childhood
Lack of investment in the productivity of the next generation is a deficit strategy, not a growth strategy***
